Photosynthesis Research **27**: 233–234, 1991.

Contents Volume 27 1991

CONTENTS Volume 27 No. 1 January 1991

Publisher's Announcement v

Minireview

Raines, C.A., Lloyd J.C. and Dyer, T.A.: Molecular biology of the C_3 photosynthetic carbon reduction cycle 1

Letter to the editors

Lavorel, J.: On the proper use of sigma analysis in the study of flash-induced oxygen evolution 15

Regular papers

Tang, D., Jankowiak, R., Seibert, M. and Small, G.J.: Effects of detergent on the excited state structure and relaxation dynamics of the photosystem II reaction center: A high resolution hole burning study 19

Bolhar-Nordenkampf, H.R., Hofer, M. and Lechner, E.G.: Analysis of light-induced reduction of the photochemical capacity in field-grown plants. Evidence for photoinhibition? 31

Havaux, M., Strasser, R.J. and Greppin, H.: A theoretical and experimental analysis of the q_P and q_N coefficients of chlorophyll fluorescence quenching and their relation to photochemical and non-photochemical events 41

Jennings, R.C., Garlaschi, F.M. and Zucchelli, G.: Light-induced fluorescence quenching in the light-harvesting chlorophyll *a/b* protein complex 57

Sakurai, H., Inoue, K., Fujii, T. and Mathis, P.: Effects of selective destruction of iron-sulfur center B on electron transfer and charge recombination in Photosystem I 65

CONTENTS Volume 27 No. 2 February 1991

Personal perspective

Arnold, W.A.: Experiments 73

Minireview

Valkunas, L., Liuolia, V. and Freiberg, A.: Picosecond processes in chromatophores at various excitation intensities 83

Regular papers

Eckert, H.-J., Geiken, B., Bernarding, J., Napiwotzki, A., Eichler, H.-J. and Renger, G.: Two sites of photoinhibition of the electron transfer in oxygen evolving and Tris-treated PS II membrane fragments from spinach 97

Paddock, M.L., Feher, G. and Okamura, M.Y.: Reaction centers from three herbicide resistant mutants of *Rhodobacter sphaeroides* 2.4.1: Kinetics of electron transfer reactions 109

Walters, R.G. and Horton, P.: Resolution of components of non-photochemical chlorophyll fluorescence quenching in barley leaves 121

Le Gouallec, J.-L., Cornic, G. and Briantais, J.-M.: Chlorophyll fluorescence and photoinhibition in a tropical rainforest understory plant 135

Hsu, B.-D. and Lee, J.-Y.: Characterization of the photosystem II centers inactive in plastoquinone reduction by fluorescence induction 143

Technical communication
Fork, D.C. and Herbert, S.K.: A gas-permeable photoacoustic cell 151

CONTENTS Volume 27 No. 3 March 1991

Regular papers
Su Lin and Knox, R.S.: Studies of excitation energy transfer within the green alga *Chlamydomonas reinhardtii* and its mutants at 77 K 157
Harley, P.C. and Sharkey, T.D.: An improved model of C_3 photosynthesis at high CO_2: Reversed O_2 sensitivity explained by lack of glycerate reentry into the chloroplast 169
Samson, G. and Fork, D.C.: Enhanced susceptibility of the oxidized and unprotonated forms of high potential cytochrome *b*-559 toward DCMU 179
Scheuermann, R., Biehler, K., Stuhlfauth, T. and Fock, H.P.: Simultaneous gas exchange and fluorescence measurements indicate differences in the response of sunflower, bean and maize to water stress 189
Govindjee, Schwarz, B., Rochaix, J.-D. and Strasser, R.J.: The herbicide-resistant D1 mutant L275F of *Chlamydomonas reinhardtii* fails to show the bicarbonate-reversible formate effect on chlorophyll *a* fluorescence transients 199
Tjus, S.E. and Andersson, B.: Extrinsic polypeptides of spinach photosystem I 209
Rapid communication
Katoh, T., Nagashima, U. and Mimuro, M.: Fluorescence properties of the allenic carotenoid fucoxanthin: Implication for energy transfer in photosynthetic pigment systems 221
